Larkspur

Soil carbon, measured continuously

Seed - 2026

CONFIDENTIAL LARKSPUR

Why now

Carbon programs pay growers per tonne of soil carbon, but measurement still relies on manual soil cores taken once a year at roughly $40 per sample.

CONFIDENTIAL · LARKSPUR

Maren Halvorson, a soil scientist, started the company in 2022 with engineer Tobias Okafor

Traction

Twelve pilot farms, 48,000 acres under measurement

Pilot growers report the dashboard replaced two of three annual sampling visits

At today's burn, cash on hand covers 14 months of runway

CONFIDENTIAL LARKSPUR

The ask

$6M seed on a post-money SAFE

Use of funds: probe manufacturing, two field engineers, verification-body approval
